About

A creative software developer specialized in building user-friendly web applications. While React is my primary expertise, I have also worked with a variety of other languages.

Experience

Frontend devloper intern

- completed an internship at Ashtar company where i enhanced my knowledge of DSA and collaborated with senior web devleopers to gain practical experince

E-commerce website

- Built a functional e-commerce website with features like authentication, product search, and a shopping cart

Clothing Store Website

- developed a modern e-commerce website tailored for Homewear products.
- used Firebase for authentication and database management, allowing users to track their orders.

Resume Creator website

- Built a website enabling users to create and download modern and professional resumes.
